

SOLAR STEALS PICK-UP GUIDE

Congratulations on your solar panel purchase. It's time to get them home—but they won't get there in your Toyota Prius. Solar panels are big and bulky, so let's review your options.

Skip the hassle of pick-up with delivery to your doorstep. Talk to your Solar Steals crew member about freight shipping today.

VEHICLES

The following are only guidelines. Review weight and size restrictions your vehicle, trailer, or equipment may have. Please contact your Solar Steals crew member with any questions.

CARS

Likely a "big nope" unless you're rocking an El Camino.

VEHICLES WITH A ROOF RACK

Minimal quantities. Limited assistance by Solar Steals due to safety restrictions.

SUV/VAN

Can't be loaded with a forklift. SUV/Vans are okay for hand-stacking less than a pallet.

FLAT-BED TRUCK

Consider weight limitations - Multiple pallets may be okay.

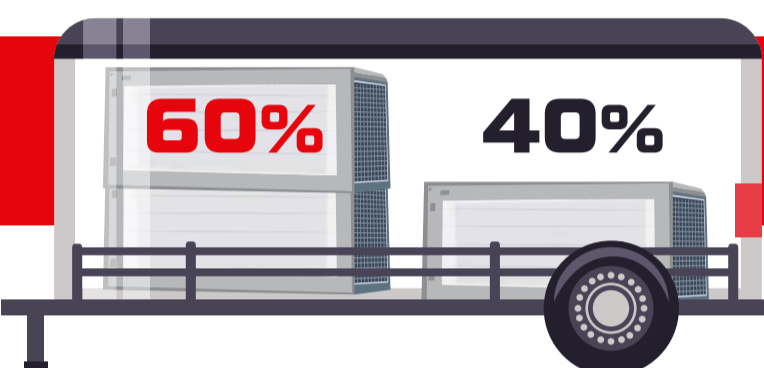

MOVING VANS/CARGO VANS

Limited loading with a forklift.

PICK-UP TRUCK/STANDARD BED

Consider the length and width of its bed (especially between wheel wells). Small trucks are okay for hand-stacking less than a pallet. Larger trucks may accommodate one full pallet.

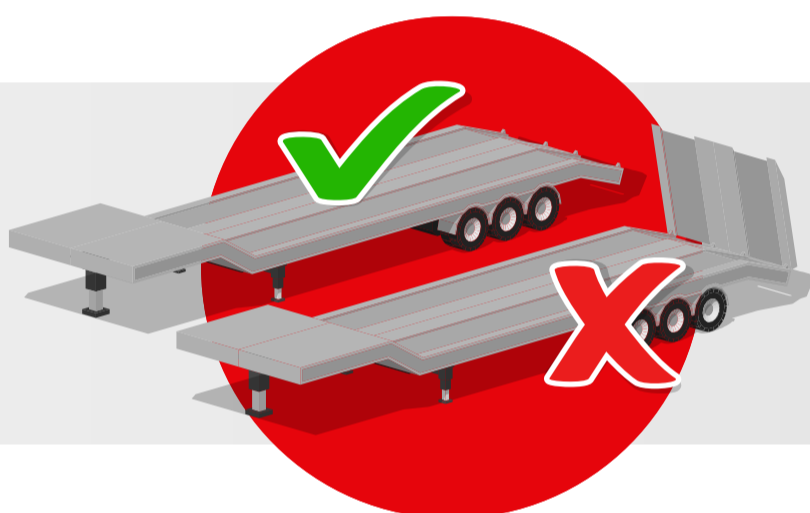

TRAILERS

'PROPER WEIGHT DISTRIBUTION'

FLATBED

A forklift can load your pallet if there's no ramp or wheel wells in the way. Multiple pallets may be okay (depending on trailer size).

ENCLOSED

NO RAMP

forklift can load

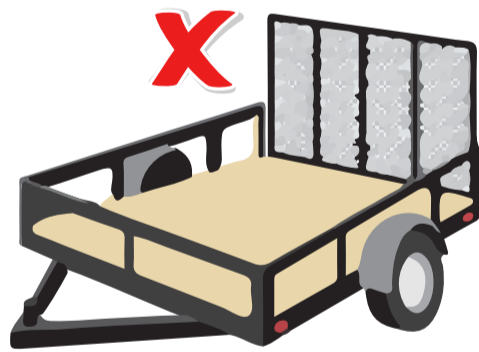

RAMP

forklift can't load (hand-stack only)

LANDSCAPE/GARDEN TRAILER

These trailers are nearly impossible to load with a forklift due to ramps and sidewalls. Solar panels will likely need to be hand-stacked.

IMPORTANT INFORMATION

The loading area of the vehicle/trailer needs to be clean and free of debris

Appointments are highly recommended as forklift and dock availability aren't guaranteed. Give us a heads-up if you're running late or need to reschedule. Our shipping dock doesn't take orders after 3 PM.

If we can't load your vehicle or trailer with a forklift there's 2 options:
Option 1: bring your buddy, and load by hand.
Option 2: we'll be your buddy, and load by hand. Solar Steals provides the first 15 minutes of hand-stacking for free. We'll load larger orders for you at \$65/hour.

Got straps? Can't get far if your panels aren't strapped down. Check your straps' limitations and breakpoints to ensure they're strong enough. Solar Steals can't assist with strapping due to insurance liability.

Your safety matters. Please stay within marked, designated waiting areas when not escorted by a Solar Steals crew member. Extra caution and attention's needed while the forklift loads your order.
